RUBBER SOLVENT

100% Organic

No. 176-058

1 Gallon

Made in USA

INGREDIENTS: 100% Citrus Terpenes

DIRECTIONS: Rubber Solvent is a citrus-based cleaning compound that facilitates the delamination of uncured rubber sections and thoroughly cleans and prepares uncured rubber sections for bonding. WEAR RUBBER OR LATEX GLOVES while using this product to prevent hard-to-remove rubber residues from accumulating on skin.

To remove a rubber lamination, warm the rubber to be worked to a temperature between 120°F and 150°F. Apply a few drops of Rubber Solvent, using a plastic squeeze bottle, to a mold cutting blade and use this blade to begin the separation of the rubber sections. As the sections begin to separate, apply more Rubber Solvent between the sections, using the squeeze bottle. To reapply any sections, use Rubber Solvent to clean the rubber surfaces to be bonded with a cloth or rag (never use paper towels).

CAUTION: *Keep away from open flames, sparks, or excessive heat. For industrial and institutional use only by trained personnel. Wear rubber gloves and eye protection. Use in well-ventilated area.*

FIRST AID: *IF SWALLOWED - Do not induce vomiting. Drink small amounts of water or milk and contact a physician. EYE CONTACT - Rinse with water for 15 minutes and seek medical attention. SKIN CONTACT - Flush with large amounts of water and remove contaminated clothing. If irritation persists, see a physician.*
