

RHODIUM PLATING SOLUTION

No. 350-910

1 gram rhodium

KIT CONTENTS:

- 2 bottles of rhodium concentrate ($1/2$ gram each)
- Distilled water
- Empty pint bottle (for mixing)

DIRECTIONS:

Pour both bottles of rhodium concentrate into the empty pint bottle. Add distilled water to the rhodium, filling the pint bottle to the top. Use adequate ventilation as slight fumes will be produced. ***Never add the rhodium to water.*** Once filled, place the cap on the mixing bottle and shake to mix the solution thoroughly. Your plating bath is now ready to use. Total volume is 500 ml.

CAUTION: Read all instructions before mixing the rhodium to a bath. Refer to the Material Safety Data Sheet precautions before handling this product. USE DISTILLED WATER ONLY, as any other kind of water will contaminate the bath. Always add water to the rhodium concentrate. Do not add rhodium to water.
